RC 78.7 R4 G73

**(The) Age of AIDS.**

PBS Home Video (2006)

Part one follows the trail of a medical mystery which began in 1981 when five gay men in Los Angeles were diagnosed with a deadly new disease. Traces the international response in the first years of the epidemic, contrasting moments of inspirational leadership with the tragedy of missed opportunities. Reveals the astounding spread of the infection to over 70 million infections in 2006. Part two explores the chasm that emerged between rich and poor following the development of the miraculous "triple cocktail" HIV treatment. While the discovery seemed to signal a new era in which AIDS was no longer a fatal disease, the high price of the drugs meant they were unaffordable to patients in developing nations. Also examines the next wave of the AIDS epidemic in some of the most populous and strategically important nations in the world, including Russia, India and China, and tracks the same pattern of official denial and political indifference that characterized the epidemic in so many other countries.

1 videodisc (240 min.)

RA643.8 .A27 2006

**Aging.**

McGraw Hill (197?)

Rebuts the common stereotype that old people constitute one homogeneous group. Emphasizes the individuality of the elderly and the variety of needs and satisfactions to be had in older age.

Video Cassette (25 min.)

HV 1451 A44

**Aging.**

Films for the Humanities (1985)

Covers the physical process of aging and examines the various body systems to see how and why they change as they age. Shows that some changes in the aging body can be slowed down or preserved.

Video Cassette (26 min.)

Teacher's Guide (4 p.)

BF 724.55 A35 A33

**The Aging Process.**

Films for the Humanities & Sciences (1992)

Explains the effects of aging on the human mind and body, explores the "damage" and "cell clock" theories about why cells wear out, and examines the lifestyle habits that affect both longevity and the quality of life; these include exercise, regular checkups for cancer, proper diet, moderate drinking, and no smoking.

Video Cassette (19 min.)

QP86 .A42 1991

**AIDS, Blood and Politics.**

PBS Video (1992)

Investigates the ten year history of AIDS and the blood supply. Asks why The American Red Cross and the FDA failed to safeguard the blood supply in the early 1980s, and why still in the 1990s, some of the nation's largest blood banks are not yet in full compliance with federal regulations on blood safety.

Video Cassette (57 min.)

RM 171 A53

**AIDS in Africa: Living With a Time Bomb.**

Films for the Humanities (1991)

This is the story of a nightmare come true: AIDS passed from husband to wife to unborn children, until whole villages have been wiped out. Those at risk have had to change sexual habits and practices and revise attitudes. The message to viewers is that ignorance of AIDS kills and anyone who engages in sex can get AIDS.

Video Cassette (33 min.)

RA 644 A25 A36343

**AIDS, The Family, and the Community.**

Films for the Humanities (1990)

Examines how AIDS is transmitted, how many cases of infection are the result of sexually active teens believing it can't happen to them, how vital community support is and how it affects us all.

Video Cassette (26 min.)

RA 644 A25 A54

**AIDS: Truth or Dare?**

Films for the Humanities & Sciences  
(2002)  
Looks at the history, transmission,  
symptoms, awareness campaigns, and the  
search for effective long-term treatment for  
AIDS.  
1 videodisc (27 min.)  
RA643.8 A424 2002

**AIDS Warriors: Confronting Africa's Health Crisis.**

Films for the Humanities & Sciences  
(2006)  
Details the struggle against AIDS in  
Angola, with particular emphasis on the role  
of the armed forces in AIDS prevention.  
1 videodisc (60 min.)  
RA643.86.A5 A33 2006

**AIDS-Wise, No Lies.**

New Day Films (1988)  
Discusses how it feels to be a  
young person growing up in the age of  
AIDS. Presents portraits of ten individuals  
whose lives are affected by AIDS.  
1 Video Cassette (22 min.) + 1 study  
guide (35 p.)  
RA643.83 .A53 1988

**[AIDS] And the Band Played On.**

HBO Video (1993)  
Follows the struggle of a few strong-  
willed men and women who took on the fight  
to save lives in the face of a mysterious  
illness now called AIDS.  
Video Cassette (2 hr. 20 min.)  
RA 644 A25 A63

**[AIDS] Changing Focus: Women, Children and AIDS.**

Newist (1991)  
Attempts to correct the perception  
that HIV/AIDS is a gay male disease. Poor  
minority women and their newborns are the  
fastest-growing newly infected AIDS  
population and the most under served. Two  
promising Chicago programs that treat these  
women are described.  
Video Cassette (29 min.)  
Teacher's Guide (25 p.)  
RA 644 A25 C42

**[AIDS] HIV & AIDS.**

S & T Video (1991)  
Provides a comprehensive review of  
HIV and AIDS, including transmission,  
testing, treatment, prevention, and  
vaccination.  
Video Cassette (33 min.)  
RA 644 A25 H58

**[AIDS] Living with AIDS.**

Films for the Humanities (1995)  
Profiles several people with the HIV  
virus over the course of two years and  
examines the issues they face. Also  
examines alternative therapies and social  
support systems.  
Video Cassette (28 min.)  
RC 607 A26 L58

National Aids Forum (1986)  
Video Cassette (1 hr.)  
RA 644 A25 N37

**[AIDS] No Rewind.**

No Excuses Prod. (1992)  
Designed to heighten teenage  
awareness about HIV and AIDS. Includes  
two stories by HIV positive youth and  
several peer educators who discuss and  
demonstrate their work in and out of the  
classroom. Storytelling, humorous role  
playing and condom how-tos encourage  
students to break through the denial myth of  
"it couldn't happen to me" and to  
communicate about social issues.  
Video Cassette (23 min.)  
RA 644 A25 N62

**[AIDS] People Like Us.**

University of Conn. (1992)  
Six young people describe the effects  
having AIDS has had on their lives.  
Video Cassette (39 min.)  
RA 644 A25 P44

**[AIDS] Positive: Life with HIV.**

KQED Video (1995)

Provides a broad range of first-person perspectives and stories which give viewers options, tools and strategies for making important choices in their own lives.

Explores life with chronic illness, becoming your own best expert, juggling fear with hope, facing up to your own mortality, planning your child's or parent's life without you. 2 Video Cassettes (4 hr.)

**Big Bucks, Big Pharma: Marketing Disease & Pushing Drugs.**

Media Education Foundation (2006)

"Big Bucks, Big Pharma pulls back the curtain on the multi-billion dollar pharmaceutical industry to expose the insidious ways that illness is used, manipulated, and in some instances created, for capital gain. Focusing on the industry's marketing practices, media scholars and health professionals help viewers understand the ways in which direct-to-consumer (DTC) pharmaceutical advertising glamorizes and normalizes the use of prescription medication, and works in tandem with promotion to doctors. Combined, these industry practices shape how both patients and doctors understand and relate to disease and treatment. Ultimately, Big Bucks, Big Pharma challenges us to ask important questions about the consequences of relying on a for-profit industry for our health and well-being"—Container.

**Brazil: Winning Against AIDS.**

Bullfrog Films (2001)

"HIV/AIDS sufferers in Brazil today get the same treatment as HIV/AIDS sufferers in the USA and Europe--the same free antiretroviral drugs, clinical care, and monitoring. Since Brazil started to manufacture its own HIV/AIDS drugs in 1997, the country's patients have proved just as capable of taking their medicines on time as Americans or Europeans, and the Brazilian government's national HIV/AIDS program has halved the death rate from AIDS, prevented thousands of new patients from being hospitalized, and helped stabilize the epidemic. This has given the lie to the drug companies' arguments. So is Brazil's program the template for AIDS treatment elsewhere? This program examines whether it can be replicated in other countries."— Container

**Cancer Detectives of Lin Xian.**

PBS (1981)

One of the first films ever to come out of modern China. Discloses the Chinese scientists' campaign against cancer of the esophagus. Lin Xian is a county in the People's Republic of China where for 2,000 years esophageal cancer has occurred far above the national average. Shows that the Chinese approach to eradicating cancer lies not in basic cell research, as it does in the West, but rather on eliminating the suspected environmental causes of the disease.

Video Cassette (1 hr.)

RC 280 E8 C36

**Cancer Warrior.**

WGBH Video (2001)

Dr. Judah Folkman shares his forty-year quest of a radically new cancer treatment including the development of the drug Endostatin. Discussed are anti-angiogenic drugs and how they can slow tumor growth by stopping the process of developing new blood vessels and interfering with the tumor's blood supply.

RC564 .E86 2002

**The Evil Dust.**

Films for the Humanities & Sciences  
(2006)

Human enthusiasm for progress--particularly when shortsighted, misguided, or tainted by self-interest--can ricochet, marring the global environment and the lives of millions. "Looking back in the light of present knowledge, it is impossible not to feel that opportunities for discovery and prevention of asbestos disease were badly missed." So wrote the England's ex-Chief Medical Inspector of Factories, Thomas Legge, in 1934. Although England began to regulate asbestos use in the 1930s, in the US the industry only began to acknowledge the dangers in the late 1970s, when corporate documents uncovered in lawsuits proved that industry officials knew of and tried to conceal the dangers of the material.

1 videodisc (30 min.)  
RC965.A7 E84 2006

**The Family Meal.**

Fanlight Productions (2005)

"Obesity is second only to smoking as the leading cause of preventable deaths in the United States. Ironically, in the midst of this epidemic, American families are chronically under-nourished. It has been suggested that one cause of today's obesity crisis is the decline of the family meal. Under ever-increasing time and financial pressures, parents may be spending less time with their children, who may in turn feel isolated and depressed, and use food to make up for the vital nurturing connection that occurs when families eat together. This short documentary is a companion film to The weight of obesity, by the same producer"—Container.

1 videodisc (ca. 19 min.)  
RJ399.C6 F36 2005

**The Famine Within.**

Direct Cinema Ltd. (1990)

Addresses the contemporary obsession with body size and shape among North American women. Combines the testimony of women who have suffered from this obsession with the views of leading experts.

**Hookworm.**

Films for the Humanities &amp; Sciences (2006)

"Estimated to infect about one-fifth of the world's population, worm parasites are especially destructive in poor, rural areas of the developing world. This program focuses on the hookworm, the stealthiest and most resilient of the helminth, or worm, varieties. Examining the insidious methods by which hookworm parasites enter the human body, the video shows how they endanger their hosts and what medical science is doing to combat the spread of infestation--with special attention to young children and pregnant women, for whom hookworms are particularly dangerous. Commentary from renowned parasitologist Dr. Peter Hotez emphasizes key medical concepts"—Container.

**Island of Shadows: D'Arcy Island Leper Colony, 1891-1924.**

Filmwest Associates (2000)

A documentary about the treatment of Chinese dying of leprosy in Canada and their incarceration on D'Arcy Island off the west coast of British Columbia. When the first case of leprosy appeared among Chinese laborers in the early 1890s, civil officials panicked. Although medical officials knew that leprosy is not seriously contagious, the victims were banished to the virtually "escape-proof" island. Their only contact with the outside world was the visit of a supply ship every three months bringing food, clothing, opium and coffins. The dying were to bury the dead themselves. Although medical officers condemned the conditions, nothing was done. The story focuses on Lim Sam, a composite character emblematic of the Chinese men banished to D'Arcy Island. The conditions for the Chinese on the island contrasted starkly with conditions at Canada's other leper hospital in Tracadie, N.B., where nuns looked after the patients, a physician was resident and meals were prepared by a cook.

**The Last Abortion Clinic.**

PBS Video (2005)

"The headlines today are filled with speculation about changes in the U.S. Supreme Court and what those changes might mean for abortion--an issue that has divided the country for more than 30 years. Heated rhetoric from both sides continues to be heard in courtrooms and on the campaign trail. But while attention is often focused on the arguments, there is another story playing out in local communities. Pro-life advocates have waged a successful campaign to reduce abortions in many places throughout the country. By using state laws to regulate and limit abortion and by creating their own clinics to offer alternatives to women, they have changed the facts on the ground. FRONTLINE investigates the steady decline in the number of physicians and clinics performing abortions, and focuses on local political battles in states like Mississippi, where only a single clinic performs the controversial procedure"—Container.

**Micro-Parasites: Invisible Death.**

Films for the Humanities & Sciences  
(2004)

"Stronger and more mobile than ever, humankind's oldest enemies--lethal micro-parasites--may be threatening the survival of the human race. Some were believed to have been eradicated from the industrialized world, only to reappear in drug-resistant strains. Others, previously known only to remote regions of the planet, are turning up anywhere an infected traveler can fly to. Examines recent outbreaks of parasitic or parasite-borne illnesses, including SARS, West Nile virus, Ebola, tuberculosis, Lassa virus, and bubonic plague"—Container.

1 videodisc (50 min.)  
RC119 .M53 2004

**The Mind's I.**

Films for the Humanities (1995)

Examines what makes a brain give rise to a unique individual. Through the examples of memory and language, shows that although the brain can be divided into regions, those regions are not independent mini-brains but vast banks of neuronal circuits that work together as a cohesive whole.

Video Cassette (58 min.)

### **The Mysterious Human Heart.**

Ambrose Video, c2007

Each of the three programs that make up "The mysterious human heart" focuses on a different aspect of what we thought we knew, what we know now, and what we're on the verge of learning about the heart.

This material is presented through the real-life dramas of people who suddenly learn that a normal, functioning heart is not something that can be taken for granted. In episode 1, we examine the heart as a muscle - pumping more than 100,000 times a day, pushing approximately five quarts of blood on an endless path delivering oxygen to every cell in the human body. This hour tells the story of the normal heart thought the histories of three people with end-stage heart failure, where a pump may be a temporary remedy, but in the long term, a transplant is often a necessity. In episode 2, a look at the physiological electrical mechanism that keep a heart beating regularly and efficiently and what happens when this most essential rhythm of life goes awry. In episode 3, the focus is on atherosclerosis, the silent blockage of the coronary arteries, which can trigger devastating and sometimes fatal heart attacks.

3 videodiscs (180 min.)

QP112 .M97 2007

**Mysterious Poison: The History of PCBs.**

Films for the Humanities & Sciences  
(2006)

Analyzes cases in which 20th-century progress resulted in consequences for the 21st-century.

Films for the Humanities & Sciences (2001)  
 Follows several psychiatric nurses at Johns Hopkins Hospital as they work with patients suffering from depression, anorexia, and other psychiatric disorders.

Video Cassette (51 min.)  
 RC440 .N88

**Old Foes, a New Threat.**

Cambridge Educational (2004)  
 "Around 76 million cases of food-borne illness occur each year in the U.S., causing thousands of deaths and hundreds of thousands of hospitalizations. This program compares and contrasts our old enemies campylobacter, salmonella, E. coli, Listeria monocytogenes, calicivirus, and Hepatitis A, which, thanks to "improved" methods of food processing, have become a renewed health threat. The program also examines some of the many opportunities for food contamination that can occur on the trip from the farmyard to the kitchen table; identifies people most vulnerable to severe cases of food-borne diseases; describes symptoms and treatments; and explains how to avoid catching these nasty illnesses to begin with"—Container.

1 videodisc (20 min.)  
 RA601.5 .O43 2004

**On Hostile Ground.**

Indirect Productions (2000)  
 Enters the lives of three abortion providers to reveal the obstacles (practical, legal, and emotional) that they face everyday, and shows them struggle with the decision to perform this procedure.

1 videodisc (73 min.)  
 HQ767.5.U5 O5 2000

**On Our Own Terms: Moyers on Dying.**

Films for the Humanities & Sciences (2000)  
 Discusses the search for new ways of thinking and talking about dying, important strides being made in the area of palliative care at pioneering institutions, the choices at the end of life, including the bitter debate over physician-assisted suicide, and how crusading medical professionals have dedicated themselves to improving end-of-life care by changing America's overburdened health system.

**Our Children at Risk.**

WNET (1991)

Discusses the need for better health care for poor families.

Video Cassette (57 min.)

RJ 102 O87

**Pain and Healing.**

PBS (1988)

Explores the mind's role in healing the body and controlling pain. Reports on discoveries which link the brain and mind to the immune system.

Video Cassette (1 hr.)

RZ 400 P35

**Pain: The Language Of The Body and Mind.**

Films for the Humanities (2000)

Pain is often the body's sole method of communicating with the mind; it alerts the brain to malfunctions and protects the body from further harm. Explores the management, psychology, and physiology of pain.

Video Cassette (60 min.)

RB127 .P34 2000 pt. 1,3

**A Paralyzing Fear: The Story of Polio in America.**

PBS (1997)

Discussion of the polio epidemic in the U.S. in the 1940s and 1950s and the struggle to eradicate the disease.

Video Cassette (1 hr. 29 min.)

RA 644 P9 P37

**A Parasite Primer.**

Films for the Humanities & Sciences (2004)

"Lethal parasites kill one human every ten seconds. Others prefer to keep people alive, for food and shelter. In this program patients discuss their encounters with botfly maggots, leeches, candiru fish, elephantiasis, tapeworms and cerebral tapeworm cysts, and a tiny water parasite that eats away at the interior of the eye. Experiments include one in which lice are scattered on a volunteer to see how they react and another in which a volunteer incubates a monstrous beef tapeworm in his digestive tract-and then expels it"—Container.

1 videodisc (50 min.)

RC119 .P337 2004

**Parasites: Eating Us Alive.**

Discovery Communications, [2006]

Looks at parasites--some benign, some deadly--that make humans their hosts. Examples are discussed in detail from the three major categories: single-celled; multicellular, or worms; and ectoparasites, those that live on the body as opposed to inside it. Experts show how these organisms proliferate through vectors, creatures that transmit parasites, such as the mosquito that carries malaria or the fly that transmits "river blindness." Interviews with victims and footage of parasitic damage are combined with commentary.

1 videodisc (50 min.)

RC119 .P343 2006

**Parasites That Harm, Parasites That Help.**

Films for the Humanities & Sciences (2004)

"This program contrasts pernicious and benign parasites through four case studies: a flesh-eating organism that nearly causes the facial disfigurement of a young woman; a mysterious malaria attack contracted by an American man who has never traveled to an at-risk locale; a vacationing child who returns home with a boil on her neck containing a very large Tumbu fly maggot; and a woman who voluntarily takes worms into her body to relieve a painful intestinal condition. Research into using beneficial parasites to treat asthma and allergies such as hay fever is also presented"—Container

Provides training on how to identify an incident that requires a Medical Device Report (MDR), how to handle incident, and make the report. Guide includes entire text of the Medical device reporting act.

Video Cassette (8 min.)

Guide (43 p.)

RA971.6 .S23 1996

**Salud!**

Bourne, Field, Keck and Reed (2006)

This video looks at the curious case of Cuba, a cash-strapped country with what the BBC calls 'one of the world's best health systems.' From the shores of Africa to the Americas, the filmmakers travel with some of the 28,000 Cuban health professionals serving in 68 countries, and interviews international medical students in Cuba -- now numbering 30,000, including nearly 100 from the USA. Their stories plus testimony from experts around the world bring home the competing agendas that mark the battle for global health -- and the complex realities confronting the movement to make health care everyone's birth right.

**Who Cares : Chronic Illness in America.**

Films for the Humanities & Sciences  
(2001)

Role-playing three interrelated scenarios and discussing the implications of the scenes they enact, the panelists call for a change in the way chronic health care in the United States is provided, managed, and financed.

Video Cassette (57 min.)  
RA644.6 .W46 2001

**Who Gets to Know?**

Films for the Humanities & Sciences,  
(2003)

"When it comes to genetic testing, how much should a patient be told? If the news is bad, who else should the patient inform? And should such privileged information be made available to employers, insurance companies, and others? This Fred Friendly Seminar moderated by Harvard Law School's Arthur Miller offers a compelling discourse on the far-reaching ethical, social, legal, and economic implications of genetic testing"—Container.
