UNITED STATES ONLINE GAMING: MONTHLY REVENUES

MONTHLY STATEWIDE AND NATIONAL DATA

UNLV SPECIAL COLLECTIONS & ARCHIVES, OCTOBER 2026

Summary

This report collects in one place data on online gaming in the United States. Currently, we track seven states that offer various kinds of online gaming: New Jersey, Delaware, Pennsylvania, West Virginia, Michigan, Connecticut, and Rhode Island. Nevada is included for the years data was available.

Nevada allows betting only on poker; Delaware allows betting on table games, video lottery, and previously poker; New Jersey permits casino games and poker; Pennsylvania allows slot, tables, and poker; West Virginia allows slot and tables games; Michigan allows multiple casino gaming options including poker; Connecticut allows slot table, and poker; and Rhode Island allows slot and table games. Note: we only track poker revenue where available, so some states that have poker are not currently included.

For years New Jersey dominated the market, with about 90 percent of total U.S. online gaming revenue. As more states added online gaming, this distribution changed. Between poker and bank win, New Jersey maintains the lead in revenue, although it is very closely followed by Pennsylvania and Michigan.

Nevada

Nevada has “interactive poker” only, with data for all three operators aggregated. This table shows the total monthly interactive poker revenue, the total monthly poker revenue, and the percentage of total poker revenue represented by poker. Nevada stopped reporting interactive poker revenue in December 2014.

- **IPR**: Interactive (online) poker revenue
- **TPR**: Total Poker revenue
- **IPR%**: Percentage of total poker revenue that was generated online.

Note: Nevada has had interactive poker since April 2013, but only began publicly reporting revenues in February 2014. However, because the Gaming Revenue Report supplies the year-on-year percent change, it is possible to calculate the approximate past online gaming win on a trailing annual basis. This table will be updated as new data is available.

New Jersey

New Jersey reports “peer to peer” (poker) and “other authorized games” win for each month, with data for each operator. As the state with the highest online gaming revenue, there are multiple sections to analyze the numbers: comparing internet win to total gaming win, comparing peer-to-peer with other games, and total online gaming win organized by operator. Online play began in November 2013.

Pennsylvania

Pennsylvania tracks online gaming by slots, banking tables, and non-banking tables (poker). Of the 17 casinos in Pennsylvania, 10 currently offer online play. In addition to those 10, there are 2 casinos that exist only as online casinos without ties to a land-based one: Bally's and Golden Nugget. Online gaming began in July 2019.
