Title:	UNLV University Libraries Collection on Nevada Mining
ID:	MS-00011
Date [inclusive]:	1842-1966
Date [bulk]:	1900-1928
Physical Description:	25.15 Linear Feet (21 boxes, 1 oversize box, 2 items, 1 flat file)
Language of the Material:	English
Abstract:	The Nevada Mining Collection is comprised of records that document mining and mines in Nevada from 1842 to 1966. The majority of the collection includes records of various mines and mining companies located in the Esmeralda, Lincoln, Clark, White Pine, and Nye counties, dating from 1900 to 1928. The collection includes financial, administrative, and business related records; photographs of miners, mining camps, and towns; correspondence; maps; newspaper clippings, pamphlets, newsletters, and booklets.

Historical Note on Mining in Nevada

In 1859 a party of prospectors on their way to the California Gold Rush discovered a large deposit of silver ore near Virginia City, Nevada that was later named the Comstock Lode. This discovery spurred the "rush to Washoe" in 1860. The lode extended down the side of Mount Davidson and miners engineered a new way to remove the precious silver and gold from less valuable base metals. The miners in Northern Nevada developed the Washoe pan process which mechanically agitated the unrefined ore with wood, water, and machinery. This new technology required large sums of money and pushed out small-time miners, paving the way for financiers from California to establish mining corporations. From 1860 to 1861 the population of Nevada nearly tripled and this economic growth contributed to Nevada attaining statehood in 1864. This prosperous mining industry in Nevada lasted until roughly 1878 and helped shape the state, pushing the borders east and south. Discoveries of gold and silver in Belmont and Eureka in Nye County, Hamilton in White Pine County, and Pioche in Lincoln County initiated smaller mining rushes into eastern and central Nevada. However, a drop in silver prices, the boom and bust economy, skewed gender ratio, and fluidity of the immigrant population led to social instability and the mines began to steadily decline in the 1880s.

Mining in Nevada experienced a second precious metal boom just after the turn of the twentieth century when miners discovered silver and gold in Tonopah and Goldfield, and later in the Bullfrog District, in central Nevada. This second mining boom, lasting from 1900 until 1923, differed from the first in a few key ways. Rather than the chaos of hundreds of individual mining stakes, mines, and mining companies that characterized the earlier Comstock period, mining enterprises in Goldfield and Tonopah were consolidated into nationally financed corporate mining conglomerates such as Tonopah Mining Company and Goldfield Consolidated Mining Company which controlled mines, mills, and railroads. The invention of the automobile connected isolated mining sites, mining technology advanced, and a better functioning system of local and state governance helped control lawlessness. However, miners of this time period often suffered from silicosis, a type of lung disease triggered by the inhalation of silica or quartzite dust. For example, Nevadans referred to the Delamar gold mine, located in Lincoln County, as the "widow-maker" due to the prevalence of silicosis during the mine's active years (1896 to 1902).

The most successful mining during this period was executed in central Nevada, in Nye and Esmeralda counties. Prospectors unearthed gold in Goldfield in 1902 and continued to excavate gold until approximately 1923. Violent incidents of labor unrest attributed to the Western Federation of Miners and the International Workers of the World (Wobblies), and the equally violent union busting by the mine owners, disrupted the mining activities in Goldfield to the point that President Theodore Roosevelt reluctantly sent Federal troops to Goldfield at the request of the Governor Denver S. Dickerson to assure public peace in 1907. Miners established smaller mining camps in Southern Nevada, in Searchlight for example, and miners discovered large deposits of copper in Northern Nevada in White Pine and Lyon counties. The second mining boom ended around 1923 when the Federal Government terminated the Pittman Act, a government subsidy that guaranteed the price of silver during the First World War.

Copper surpassed silver and gold as the top exported mineral in Nevada after the 1920s. The federal government's need for copper during World War I caused a growth in the copper mining industry in Northern Nevada. This demand for base metals like copper for industrial production marked another shift in

the mining industry in Nevada. Similarly, the Federal Government required Nevada's great mineral wealth during World War II. One of Southern Nevada's largest exports during World War II was magnesium, used in the production of aluminum alloy munitions casings and airplane parts. Basic Magnesium Incorporated established magnesium ore mining operations in Nye County, constructed a refining plant in Clark County, Nevada, and operated from 1941 to 1944.

During the post-war period, Nevada mining companies continued extracting base metals used in industrial production (like magnesium and copper) and expanded these operations, mining minerals like gypsum in Clark and Washoe counties; diatomite in Pershing and Storey counties; iron, tungsten, zinc, lead, barite, borax, scoria, limestone, silica, sand, perlite, and fluorspar. During the Korean War (1950-1953), war production again required these minerals and metals for use in weapons and machinery construction. After many successful years of production, the copper mining industry declined and eventually collapsed by the 1970s.

In the late 1970s, prospectors, with the help of geologists, discovered a large amount of gold, though microscopic and mixed with undesirable elements, in Ely, Nevada. The nature of the gold deposit required modern excavation machinery and refining technology to extract the gold from open-pit mines. This gold rush lasted from the 1980s through the 1990s. The mining industry continues steadily into present day, with mines across the state removing minerals, base metals, precious metals, and semi-precious gemstones from the Nevada landscape.

Scope and Contents Note

The Nevada Mining Collection is comprised of records that document mining and mines in Nevada from 1842 to 1966. The majority of the collection includes records of various mines and mining companies located in the Esmeralda, Lincoln, Clark, White Pine, and Nye counties dating from 1900 to 1928. The collection includes records: financial, administrative, and business related; photographs of miners, mining camps, and towns; correspondence; maps; and publications: newspaper clippings, pamphlets, newsletters, and booklets.

[^ Return to Table of Contents](#)

Arrangement

Material is divided into seven series. The general mining series is first, followed by series on specific mines arranged roughly in chronological order:

Series I. Mines and mining in Nevada, 1866-1961;

Series II. Eberhardt and Aurora Mining Company, 1842-1877;

Series III. James D. O'Brien photographs, 1901-1929;

Series IV. Nevada-Utah Mines and Smelters Corporation, 1905-1937;

Series V. Tonopah Mining Company, 1907-1928;

Series VI. Florence-Goldfield Mining Company, 1912-1918;

Series VII. Techatticup Mine, 1914-1923.

[^ Return to Table of Contents](#)

Administrative Information

Access

Collection is open for research.

Publication Rights

Materials in this collection may be protected by copyrights and other rights. See [Reproductions and Use](#) on the UNLV Special Collections website for more information about reproductions and permissions to publish.

Acquisition Note

This is an artificial collection. Materials were gathered or purchased by the Director of Special Collections starting in the late 1970s; accession numbers MS11, MS11A, MS11B, MS11C, MS11D, and MS11E.

Additions

Further accruals are anticipated.

Processing Note

Material was processed by Kelli Luchs in 2008. Su Kim Chung revised the finding aid in 2012. In 2014, as part of a legacy finding aid conversion project, Hannah Robinson brought a number of small collections together and re-wrote the collection description in compliance with current professional standards. In 2016, Joyce Moore completed the collection and entered it into ArchivesSpace.

Revision Description

The finding aid was revised by Hannah Robinson to bring it into compliance with DACS. July 2014

Collection Inventory

Mines and Mining in Nevada, 1866-1961 (1900-1928)

Physical Description: 16.5 Linear Feet (8 boxes, 1 oversize box, 2 items, 1 flat file)

Scope and Contents Note: The Mines and Mining Series comprises business and legal materials that document the history of mining in Nevada from 1866 to 1961. The majority of the series includes records of various mines and mining companies located in Lincoln, Clark, Esmeralda, White Pine, and Nye counties dating from 1900 to 1928. Materials include financial records, business records, prospectuses, brochures, stock certificates, correspondence, invoices, employee lists, maps, newspaper clippings, purchasing records and mill foreman reports. The series also documents the construction of infrastructure in mining towns including railroad engineering, booster development, and business records.

Arrangement: Material is arranged alphabetically by record type and then alphabetically by name of the mine, or by the county in which the mine is located.

Eberhardt and Aurora Mining Company, 1872-1877

Physical Description: 0.42 Linear Feet (1 box)

Scope and Contents Note: The Eberhardt and Aurora Mining Company Series comprises the administrative records and financial documents of the company dating from 1872 to 1877. The majority of the collection contains correspondence. There are also several documents that pertain to the mining company's finances such as bills, receipts, cancelled checks, statements, and financial notes.

Arrangement: Material is arranged alphabetically by material type.

Historical Note on the Eberhardt and Aurora Mining Company: The Eberhardt and Aurora Mining Company was located in White Pine County outside of the city of Hamilton in Central Nevada. The British-owned Eberhardt and Aurora Mining Company, founded in 1869, was one of the primary silver mines in Nevada. In 1871, the owner of the mine began the extensive construction of the camp. The mining company built a post office, saloons, wagon shop, carpenter shop, blacksmith stores, and several other buildings and businesses. By 1885, however, the company shut down after irregular operations.

James D. O'Brien photographs, 1901-1929

Physical Description: 6.75 Linear Feet (7 boxes)

Scope and Contents Note: The James D. O'Brien Series comprises photo albums and scrapbooks created by James D. O'Brien, surveyor, mining engineer and sometime prospector, from 1901 to 1929. O'Brien's photographs feature locales in Central and Southern Nevada and Death Valley, California. Photos depict life and work in mining camps; miners and their families, including Shoshone Indians; mining company financiers; landscape and town shots; and photos of O'Brien and his family. Locations include Pahrump, Nevada; Pioneer, Nevada; Rhyolite, Nevada; Wahmonie, Nevada; and Death Valley, California.

Arrangement: Material is arranged by geographic location.

Title/Description	Containers
Nevada Mines Photo Album 1: Pahrump, Nevada, mining site landscape shots, carbonite vein at the Pahruneah Mine, mining camps, prospectors, Shoshone Indian workers, Butte site near Bare Mountains, owned by Pacific Quarries Incorporated, 1920s	box 11
Nevada Mines Photo Album 2: Nevada Mines: Sierra Blanca, Yellow Jacket, and Liberator; mining engineering works, mining claim owners and workers, landscape shots, 1910s	box 11
Pioneer, Nevada Photo Album 1: mostly pictures of James D. O'Brien and family, some landscape and mining shots, 1910s	box 12
Pioneer, Nevada Photo Album 2: pictures of James D. O'Brien and family in various California locations, Shoshone Indian camp, Yellow Jacket mine engineering, Holland Hotel staff, family in automobiles in California, hot springs near Pioneer, 1910s	box 13
Pioneer, Nevada Photo Album 3: aerial views of towns and mining sites, Yellow Jacket mine, women and girls, Mayflower mine, Shoshone mine in Rhyolite, Nevada, James D. O'Brien, Cresone, Colorado, Virginia City, families, ranches, 1900-1910	box 14
Wahmonie, Nevada Photo Album: Death Valley, California, people, mineral veins, Beatty, Nevada, Wahmonie financiers and miners, 1910s-1920s	box 15
Wahmonie, Nevada Scrapbook: newspaper articles and a small amount of photos about the Wahmonie gold rush, 1920s	box 16
Death Valley, California Photo Album 1: Scotty's Camp site; Pioneer, Nevada; Shoshone miners and Shoshone families; Death Valley crater "tumbite-a-mosa", 1910s	box 17
Death Valley, California Photo Album 2: Death Valley; Carrara, Nevada; Rawhide, Nevada; American Indian families, families of miners; miners; landscapes; mining camps; towns, 1910s-1920s	box 17

Nevada-Utah Mines and Smelters Corporation, 1905-1949

Physical Description: 0.42 Linear Feet (1 box)

Scope and Contents Note: The Nevada-Utah Mines and Smelters Corporation Series comprises the financial records of the company dating from 1889 to 1949 with the majority of the materials dating from 1905 to 1915. The series contains bank records, accounts, and some correspondence, which is generally related to the company's financial activities. It also includes company vouchers, bills, receipts, and checks.

Arrangement: Material is arranged alphabetically by item type.

Historical Note on the Nevada-Utah Mines and Smelters Corporation: The Nevada-Utah Mines and Smelters Corporation purchased the Manhattan mine in Pioche, Lincoln County, Nevada in 1907. The Nevada-Utah Mines and Smelters Corporation participated in the second gold and silver mining boom in Lincoln County made possible by the construction of the Union Pacific transcontinental railroad through Lincoln County, with a branch line connecting to Pioche. The company sold their assets and stopped mining production in 1912 due to bankruptcy.

Florence-Goldfield Mining Company, 1912-1918

Physical Description: 0.42 Linear Feet (1 box)

Scope and Contents Note: The Florence-Goldfield Mining Company Series comprises the financial records of the company dating from 1912 to 1918. The series contains primarily bills and receipts associated with purchases from various businesses located in Goldfield and elsewhere including: Nevada-California Power, Al Mills-General Blacksmithing, Wood and Sullivan Hardware, Verdi Lumber Company, Ferry's Transfer Company, and the Union Drayage Company.

Arrangement: Material is arranged chronologically.

Historical Note on the Florence-Goldfield Mining Company: The Florence-Goldfield Mining Company produced gold in the Goldfield mining district in Esmeralda County, Nevada. The company built a gold mine on Malpais Mesa, and a mill on the outskirts of the town of Goldfield. Prospectors discovered gold in 1902, and by 1904 the city of Goldfield developed into a camp of several thousand people. By 1905 the Florence-Goldfield Mining Company's total gross output was valued at \$1.5 million. By 1909 the company's principal mine was Florence located east of Goldfield. The company also owned the Red King, Cornishman, Firelight, and Emma claims and leased the Sweeney, Reilly, Little Florence, Florence Annex, Rogers, and Engineers' claims.

Techatticup Mine, 1914-1923

Physical Description: 0.85 Linear Feet (2 boxes)

Scope and Contents Note: The Techatticup Mine Series comprises administrative and financial records associated with the Techatticup Mine, located in Clark County, Nevada, dating from 1914 to 1923. The administrative documents include business reports, prospectuses, and assays. Administrative documents also include foreman reports, insurance records, warehouse inventories, correspondence, and notes relating to equipment, food, employment, and taxes. Financial records include account balances, payroll, purchasing records, statements, bills, receipts, and company vouchers.

Arrangement: Material is arranged by item type.

Historical Note on the Techatticup Mine: The Techatticup Mine is located thirty-nine miles southeast of Las Vegas in Eldorado Canyon, Clark County, Nevada. Prospectors discovered gold in the Eldorado Canyon, then part of the Colorado Mining District, in 1861. The mine's name was derived from the Paiute word for "hungry." During its heyday, it produced millions of dollars in gold, silver, copper, and lead which steamboats transported south on the Colorado River to Yuma, Arizona. Although George Hearst (father of newspaper tycoon William Randolph Hearst) held some interest in the mine in its early years, the Techatticup Mine was owned primarily by the El Dorado Mining Company until 1879. At that time it was purchased by the Southwestern Mining Company (SMC), which later sold it to Barker Brothers of Philadelphia, an international mining firm. Barker Brothers mortgaged the SMC to fund a foreign mining venture, and this foreign venture failed, leading to the sale of the SMC to Joseph Wharton at a sheriff's sale in 1895. A second period of mining at the Techatticup Mine occurred from 1914 to 1918.
